Tracheids Tech Hub, 2025

## LANGUAGES

English (fluent)

## PROJECTS

### Papaya Tube

- Built a video streaming app with React, showcasing video categorization and seamless user interaction.
- Designed a responsive and user-friendly interface, optimizing for both mobile and desktop devices.
- Implemented video search functionality for easy content discovery.

### Educational App

- Currently developing an educational platform for Nigerian students, offering over 2000 downloadable materials.
- Features include user sign-up, class level selection, and categorized material retrieval based on class levels.
- Integrates Firebase for backend storage and retrieval of educational content, with automated upload and file tagging processes.

### Portfolio Website

- Built a personal portfolio site with React, showcasing my projects, resume, and contact form.

### Miscellaneous Projects

- Developed several small-scale web applications and mock websites to hone skills in frontend development, UI/UX design, and interactivity.
- Applied principles of responsive design, cross-browser compatibility, and accessibility.
- Built interactive features like forms, animations, and basic CRUD operations using JavaScript, HTML, and CSS.
